PREFACE TO THE LETTERS Q AND R.

THIS half-volume contains the words which begin with Q and R, the former being few in number in comparison with the latter. When reckoned up according to the system adopted for previous letters, Q is found to include 1633 Main words, 265 Combinations explained under these, and 423 Subordinate entries of obsolete or variant forms; in all 2321. The obvious Combinations, recorded and illustrated by quotations, but not requiring to be explained, number 408 more. Of the Main words, 389 are marked † as obsolete, and 56 are marked ‖ as alien or not fully naturalized.

On the other hand, R includes 10,434 Main words, 1273 special Combinations, 3579 Subordinate entries, or in all 15,286; there are further 2546 obvious Combinations, making a total of 17,832. Of the Main words 2475 are marked as obsolete, and 258 as alien.*

The words beginning with Q (which in ordinary use is always followed by *u*) may as a whole be divided into three main classes, the native English, the Romanic (chiefly Latin and French), and those adopted from more remote (especially African, Asiatic, and American) languages. Of these classes the second is by far the greatest, and covers rather more than 50 pages out of the total of 80 required by this letter, which from the dictionary point of view is one of the smallest in the alphabet. A considerable number of words have been taken over from Latin without any change of form, as *quære*, *quantum*, *quarto*, *quondam*, *quorum*, etc., while many more have been assimilated to the usual English types. Some of these had their immediate source in Old French, which has also contributed very largely, e.g. *quaint*, *quarrel*, *quarry*, *quarter* (with a remarkable development of special senses, combinations, etc., extending to 19 columns), *quest*, *quit*, *quite*. Under the influence of the French and Latin spelling, *qu-* was substituted for the Old English *cw-*, and this accounts for the appearance here of a certain number of native words, covering, however, no more than 16 pages. The most important of these are *quake*, *quean*, *queen*, *quell*, *quench*, *quick* (which with its derivatives and combinations takes up 18 columns), and *quoth*. There are also some later words not demonstrably of foreign origin, a number of which appear to be imitative and intended to express the idea of shaking or trembling, as *quab*, *quag*, *quap*, *quave*, *quaver*, *quiver*, *quop*. The more alien words are of slight importance in comparison with the rest, but include *quagga*, *quassia*, and *quina* (whence *quinine*, etc.).

The sources of R are more varied than those of Q, the letter being a common initial in many languages, but by far the greater number of the words beginning with it are naturally either Teutonic or Romanic. Greek, however, is the main source of the combination RH-, which extends over 15 pages. Apart from this small portion, the letter falls into two clearly marked divisions. The first of these includes RA- and from RI- to the end, and is marked by a fairly even balance of the Teutonic and Romanic elements, each of which contributes a large number of the commonest and most essential words in the language. As usual, the native English words form the largest body within the Teutonic group, next come the Scandinavian, and last of all the Dutch, Flemish, and Low or High German. The second division is that of words beginning with RE-, which occupy no less than 436 pages, or more than half of the entire letter. By far the greater part of these are formed by means of the Latin prefix RE-, the remarkable development of which in English is traced in the special article on pp. 186–7. The vast stretch of such forms, however, is broken here and there by important Romanic words of different formation, as *real*, *realm*, *reason*, *regal*, *regular*, etc., and by native or Scandinavian words, as *read*, *ready*, *reap*, *reck*, *reckon*, *reed*, *reef*, etc.

Some other features of R may be briefly noted. It includes a remarkable number of groups of monosyllabic words, written and (usually) pronounced alike, but of widely divergent origin and meaning. Examples of these are *race*, *rack*, *rag*, *rail*, *rake*, *rap*, *rape*, *rash*, *rat*, *rate*, *rave*, *ray*, and in the later portion,

* For these letters the comparative scale of this work and some other Dictionaries is shown by the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century'.	Funk's 'Standard'.	Here.
Q. Words recorded	245	874	1058	971	2729
Words illustrated by quotations	182	349	461	108	2253

Words illustrated by quotations	1549	3370	3755	977	17713
Number of quotations	5002	5451	11670	1310	110269

In the corresponding portion of Richardson the quotations number 531 for Q and 5765 for R.

rout, *rove*, *row*, *ruck*, *ruff*. Very long articles are not numerous, but the verb RUN covers 37 columns, and the words derived from it occupy a good many more. The groups RIGHT and ROUND are also extensive, and the adjective RED has developed a surprising number of special collocations. Many words in R have considerable historical interest, such as *ragman*[2], *railroad* and *railway*, *reader*, *receiver*, *recorder*, *rector*, *reformation*, *register*, *regrater*, *reredos*, etc., and the treatment of these has frequently required special investigation and outside advice.

The material originally collected for Q was subedited for the Philological Society by Mr. H. Hucks Gibbs, afterwards Lord Aldenham, whose work on it was of important service, although much new material had accumulated before the final editing began. Part of the original material for R (down to *Reb-*) was very carefully subedited about the same time by the Rev. Prof. Skeat, while at a later date (1885–6) *Rec-* to *Rig-* was done by Mr. P. W. Jacob, and from 1893 to 1895 the remaining portion was worked over by Mr. J. Bartlett. Further work on the earlier part of the letter (down to *Rashness*) was also done from 1894 to 1897 by the Rev. G. B. R. Bousfield. Here also much additional material had been collected during the intervening years.

The whole of the proofs of Q and R were read by Mr. A. Caland of Wageningen, whose death on Feb. 18 of this year has deprived the Dictionary of one of its most devoted and helpful voluntary workers. For the earlier sections they were also read by the late Lord Aldenham (as far as *Reserve*) and the Rev. J. A. Milne (latterly of Cramond, Midlothian). Mr. H. Chichester Hart read those of R down to the time of his death in 1908, and the Rev. Canon Fowler of Durham has helped with the later sections of the letter.

In the etymologies of all words adopted from languages not generally studied constant help was received from the late Mr. James Platt, Jun., who had made this branch of study particularly his own, and continually anticipated the needs of the Dictionary in respect of such words. For help readily given on other points acknowledgements are due to many persons, of whom the following require to be specially mentioned: Dr. Bywater, Prof. Cook Wilson, the Provost of Oriel, Mr. H. T. Gerrans, the Controller of the University Press, and the Librarian of the Indian Institute; the Rev. Prof. Skeat, Dr. Furnivall, Prof. Toller, the Rev. Prof. Hogg, Manchester, and Prof. Latta, Glasgow; the former and the present Keeper of the Advocates Library, Edinburgh, the late Dr. T. G. Law of the Signet Library, Dr. D. Hay Fleming, and Mr. Maitland Anderson of the University Library, St. Andrews. Dr. A. M°Kenzie of the Birkbeck Institute has assisted with chemical terms, and Mr. C. Davies Sherborne supplied a number of references for words belonging to the physical sciences. The numerous contributions of Mr. R. J. Whitwell have, as always, been of the greatest service for the treatment of legal and historical terms. In addition to these, many persons, in some cases on behalf of business firms, have readily given useful information relating to the origin, history, or some particular application of a single word.

The important work of verification at the British Museum Library, without which many matters would remain doubtful, was voluntarily performed by Mr. E. L. Brandreth until his death in Dec. 1907, and since then has been generously undertaken by Mr. W. W. Jenkinson.

The assistants who have taken a leading share in the preparation of Q and R, either during the whole or a considerable part of the time, have been Messrs. E. J. Thomas, J. M. Ramsay, L. F. Powell, F. R. Ray, R. Girvan, J. H. Smithwhite, G. Watson, H. E. G. Rope, and Mrs. L. F. Powell. The words beginning with RH- were separately prepared by Mr. C. T. Onions.

PREFATORY NOTES.

Q. THIS section contains 1407 Main words, 265 Combinations explained under these, and 649 Subordinate entries; in all 2321. The obvious combinations, recorded and illustrated by quotations, but not requiring individual explanation, number 408 more. Of the 1407 Main words, 962 are current and fully 'English,' 389 are marked † as obsolete, and 56 are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some more recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded	245	874	1058	971	2729
Words illustrated by quotations	182	349	461	108	2253
Number of illustrative quotations	611	561	1316	156	9480

The number of quotations in the corresponding portion of Richardson is 660.

Comparatively few of the words beginning with Q in English are of native origin. Out of the 80 pages of which this section consists, not more than 16 are occupied with the treatment of native words (even including several of doubtful etymology which appear in early Middle English). On the other hand the Latin element (adopted directly or through French) covers rather more than 50 pages. Of those words which have come down from OE. and are still in current use, the most important are *quake*, *quean*, *queen*, *quell*, *quench*, *quern*, *quick* (which with its derivatives and combinations occupies 18 columns), and *quoth* (a relic of the obs. vb. *quethe*). The other Teutonic tongues have contributed very little; † *quart* (a. and sb.[1]) and *quey* are from ON., *quacksalver* (abbrev. *quack*) from Du., and *quartz* from German. Here may also be mentioned an interesting group of onomatopoeic words which express the idea of shaking or trembling, as *quab*, *quag* (see also *quagmire*), *quap*, *quave*, *quaver*, *quiver*, *quop*.

A notable feature of the Latin element in Q is the number of words adopted without change of form, as *quære*, *quantum*, *quarto*, *quondam*, *quorum*, etc. Those modified in accordance with English usage are also very numerous and important. Some of these were no doubt originally adopted through OFr., which has otherwise contributed largely, e. g. *quaint*, *quarrel*, *quarry*, *quarter* (with a remarkable development of special senses, combinations, etc., extending to 19 columns), *quest*, *quit*, *quite*, etc. From mod.Fr. come *quadrille*, *quarte*, *quartet(te*, *quinte* and *qui vive* (erroneously explained in most English dicts.). The other Romanic tongues are very slightly represented.

More remote languages (American, African, etc.) have given such words as *quagga*, *quahaug*, *quamash*, *quandong*, *quassia*, *quetzal*, *quina* (with numerous derivatives) and *quinoa*: in the etymologies of these some advances have been made on previous dictionaries.

More or less obscurity still attaches to the etymology of a considerable number of words in this section, some of which have been the subject of much discussion. Such are *quaff*, *quail* vb., *qualm* sb.[3], *quandary*, *queasy*, *queer*, *quibble*, *quill*, *quip*, *quirk*, *quiver* vb., *quiz* and *quoit*. In these cases the historical evidence collected here may assist in leading to more definite results than have yet been attained.

R—Reactive. This section contains 1434 Main words, 294 Combinations explained under these, and 1237 Subordinate entries, or 2965 in all. The obvious combinations recorded and illustrated number 738, making a total of 3703. Of the Main words 388 are marked † as obsolete, and 66 are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some more recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.*	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *R* to *Reactive*	257	1189	1440	1281	3703
Words illustrated by quotations	204	427	492	116	2965
Number of illustrative quotations	809	769	1731	181	14182

* Including the Supplement of 1902.

The number of quotations in the corresponding portion of Richardson is 760.

As few of the words dealt with in this section have required extensive treatment, the number it contains is comparatively large. A notable feature is the prevalence of groups of monosyllabic words having the same form, but of different origin and meaning; the most striking examples of this are *race, rack, rag, rail, rake, rap, rape, rash, rat, rate, rave* and *ray*. In the section as a whole, both the Teutonic and Latin elements of the language are well represented.

Among the more important words of English origin are *rafter, raid* (an old Sc. form, revived and popularized by Scott), *rain, rainbow, rake* sb.[1], *ram, rank* adj., *rather, raven, raw,* and *reach*. The adoptions from Scandinavian are numerous, and include *race* sb.[1], *raik, rake* v.[1], *ransack* (probably also *rack* sb.[1], *raft* and *rag*), together with the verb *raise*, which has flourished at the expense of the native *rear* and forms the longest article in the section. A Du. or LG. origin seems probable in a few cases, as *rack* sb.[2] and sb.[3], *rant,* and *ravel*. The French element is very large, and includes many of the commonest words, as *race* sb.[2], *rage, rail* sb.[2] (whence the Eng. combs. *railroad* and *railway*), *raisin, rampant, rampart, random, range, ransom, rascal, ravage, ravish, ray*. The Fr. *raser* to shave, etc., appears in the three forms *race, rase,* and *raze*, each of which has now a specific sense. Among the Latin words which have been adopted (directly or through Fr.) with only a slight change of form are *rabid, radial, radical, ramify, rancour, rapid, rapt, rapture, rare, rate, ratify, rational*; of purely Latin form are *rabies, radius, radix, ratio*. The article on the prefix Re- introduces a class of Latin words and types which will bulk very largely in the sections immediately following on the present. The Gaelic contribution is as usual very small, being limited to *raith, rann, rapparee,* and *rath*. Adoptions from the more remote languages are also somewhat limited, the most prominent being *rabbi(n), racoon, rajah, rajput, raki, ramadan,* and *rattan*.

The ultimate origin and precise history of a certain number of words still remains more or less obscure; of these perhaps the most interesting and perplexing is Ragman[2].

Reactively—Ree. This section contains 1390 Main words, 412 Combinations explained under these, and 843 Subordinate entries, making 2645 in all. The obvious combinations, recorded and illustrated by quotations, number 395, giving a total of 3040. Of the Main words, 377 are marked † as obsolete, and 22 are marked ‖ as alien or not fully naturalized.

Comparison with Dr. Johnson's and some more recent Dictionaries gives the following figures:—

	Johnson.	Cassell's 'Encyclopædic'.	'Century' Dict.	Funk's 'Standard'.	Here.
Words recorded, *Reactively* to *Ree*	291	1195	1432	1092	3040
Words illustrated by quotations	255	515	529	123	2677
Number of illustrative quotations	872	778	1605	174	16156

The number of quotations in the corresponding portion of Richardson is 945.

Although this section contains comparatively few words of native origin, some of these are of considerable importance and interest, as the vb. *read* and its doublet *rede, ready, reap* (with a puzzling variety of early forms), *rear* (the native verb corresponding to the Scand. *raise*), *reck* and *reckless* (with their obs. variants *retch* and *retchless*), *reckon,* and finally the adj. Red, the specific applications of which have involved much research and occupy a considerable amount of space. Of less prominent words, mention may be made of *read* sb.[1], *ream* sb.[2], *rear* adj.[2], *rearmouse,* and *rede* sb.[1]

Apart from these, the important words in the section are of Latin or French origin, and many of these hold a very prominent place in the language. With a few exceptions, such as *real, realm* and *reason*, these words are formed with the prefix *re-*, although the original force of this is in many cases no longer felt. Among those which have most closely retained the Latin form are *rebel, rebellion, recant, recede, recent, reception, recess,* etc., while French influence is prominent in *rebate, rebound, rebuke, rebut, receive, recover, redress,* etc. The very abstract sense of some of these words (as *receive, recover*) causes considerable difficulty of arrangement, which is sometimes increased by the large number of obsolete uses which have to be recorded, as in the case of *redound, redress, reduce*. Formations of the type *readapt, readdress, readhere,* etc., are numerous, but seldom of special interest. In some cases the main element in such words is of English origin, as *rebellow, recall, recast, recut*.

The only notable words which have a more remote origin than the above are *realgar, ream* (of paper), and *rebeck*. Etymological difficulties are comparatively few, and of minor importance.

Of words having a historical interest those which chiefly deserve mention are *rebato, recheat, recognition, recognizance, recovery,* and the agent-nouns *reader, receiver, recorder, rector*.

Q.

Q (kiū), the seventeenth letter of the modern and the sixteenth of the ancient Roman alphabet, was in the latter an adoption of the Ϙ (*κόππα*, *koppa*) of some of the early Greek alphabets. The Phœnician letter from which this was derived had the forms ϙ, φ, ϕ, and was used as the sign for the deeper or more guttural of the two *k*-sounds which exist in the Semitic tongues (Hebrew ק, Arabic ق). Though this sound had no real equivalent in Greek, Ϙ is found in early inscriptions, e. g. as the initial of *Κόρινθος* Corinth, but was not accepted as a letter of the Athenian alphabet, being retained only as a numerical symbol = 90. In Latin, however, Q was regularly employed, in combination with V, in representing the double sound (kw) which arose partly from the labialized velar guttural, as in *quis*, *quattuor*, and partly from a palatal *k* followed by the labial semi-vowel, as in *equus*. In the Romanic tongues this Latin combination was either retained with its original value, or in certain cases (esp. in Fr.) was modified to a simple *k*-sound. In the former case the spelling with *qu-* has commonly been retained, even where the sound has at a later period been reduced to (k).

The Latin *qu-* might naturally have been adopted in OE. orthography to represent the Common Teutonic initial combination *kw-* (for which Wulfila employed the special sign ᵿ); but though *qu-* is found in the earliest glosses and occas. in the Rushworth gospels, the ordinary OE. symbol for the sound was *cw-* (in early use also *cu-*). After the Conquest *qu-* was again introduced, though at first sparingly employed; *quarterne* appears in the Laud MS. of the OE. Chron., an. 1137, the *Lambeth Hom.* have *quic*, *quiken* (but *cweð*, *cwiðe*), and Ormin has *quarrterrne* once, though regularly using *cw-* except in *quaþþrigan*. In the 13th c. the usage varies in different MSS., and sometimes even in the same text. The earlier version of Layamon has regularly *qu-*, the later *cw-*; the *Leg. St. Kath.* and *Jul.* have *cw-*, but *qu-* in *quoð*; and the *Ancren Riwle* usually *cw-*, even in French words, but also *qu-*, esp. in French words. In *Gen. & Exod.* there is no *cw-*, only *qu-* or *quu-* being used. By the end of the 13th c. *cw-* was entirely discontinued, and *qu-* (or its variants *qv-*, *qw-*) was the established spelling for all cases of the sound (kw), whether of English, French, or Latin origin. The author of the *Ayenbite*, however, also writes *ku-*, and this, as well as *kw-*, is occas. found in other MSS. of the 14–15th c.

In certain dialects of ME., however, the combination *qu-* (*quu-*, *qv-*, *qw-*) was not confined to words in which it represented OE. *cw-* or Romanic *qu-*, but also took the place of ordinary ME. *wh-* (OE. *hw-*), as in *quan*, *quat*, *qvele*, *qwelpe* = when, what, wheel, whelp. The earliest occurrence of these spellings is in *Gen. & Exod.*, where they are exclusively employed; in later use they are characteristically northern, and are found as late as 1570, Levins having *quilome*, *quip* = whilome, whip. In the 14–15th c. the combinations *qh-* and *qhw-* are similarly employed in MSS. written in the NE. midlands. Scottish scribes preferred *quh-* (*qvh-*, *qwh-*), which is also, though more rarely, used in northern English MSS.; this orthography survived till the 17th c., and is defended by A. Hume (*Orthogr. Brit. Tongue* 18) as a more correct method of representing the sound than *wh-*. On the other hand *wh-* was freq. written by northern scribes in the 14–15th c. in place of *qu-*, as *whik*, *wheme*, *white* = quick, queme, quite; and alliteration of original *qu-* with *wh-* is not infrequent in some poems, as the *Wars of Alexander*, *Destr. Troy*, and *Morte Arthure*. The pron. implied by this is still current in the northern and north-midland counties (not in Scotland): see esp. the words QUAINT, QUEME, QUEY, QUICK.

In certain words of French origin, *qu-* varies with *c-* in ME. and early mod.E. As in OF., this is most common when *oi* or *ui* follows: see the forms given under *coif*, *coil*, *coin* (*quoin*), *coyn*, *quoit*, *cuirass*, *cuir-bouilli*, *cuisse*, *cushion*, *custron*, and *quaint*. More rarely *que-* replaces original *co-* or *cu-*, as in *quengeoun* congeoun, *quenger* conjure, *quenquest* conquest, *queral* coral, *querch* curch, *quesing* cousin, *questrel* custrel; with these cf. the Norman *quemander*, *quemencher*, *quemodité*, *quemun*, etc. (Godef. and Molsy). In a few cases the *qu-* forms survive in western dial., as *querd* cord, *quile* coil, *quine* coin, *quirt* court. A similar variation of *c* and *q* in native words is rare, but *quo-* is sometimes found for *co-*, as in *quod* cod, *quodgel* cudgel, *quore* core, *quorn* corn: see also QUEEST, QUITCH *sb.*[1] and COUCH *sb.*[2], QUID *sb.*[3]

In ordinary mod.Engl. words Q is employed only in the combination *qu*, whether this is initial as in *quake*, *quality*, medial as in *equal*, *sequence*, or forming a final consonant (k) as in *cheque*, *pique*, *grotesque*. There is, however, a growing tendency among scholars to use Q by itself to transliterate the Semitic *kōph*, writing, e. g., *Qabbala*, *Qaraite*, *Qurán* for *Cabbala*, *Karaite*, *Koran*.

Quadri- (kwo·dri), a first element used in combs. with the sense 'having, consisting of, connected with, etc. four (things specified)'. The L. *quadri-* was so employed in a few words during the classical period, as in the sbs. *quadriduum, quadriennium, quadrirēmis, quadrivium*, the adjs. *quadrifidus, quadrijugus*, and the pple. *quadripartītus.* In the post-classical and later language such compounds are much more numerous, esp. adj. forms, as *quadriangulus, -ennis, -formis, -gamus, -laterus*, etc. (See also QUADRU-.)

The earliest examples in English are *quadrangle, quadripartite, quadrivial*, which are as old as the 15th c.; others, as *quadrifid, quadriform, quadrilateral, quadrireme* were introduced later, esp. in the 17th c. By far the greater number of *quadri-* compounds, however, belong to the language of modern science, the employment of the prefix in popular words being much rarer than that of *bi-* and *tri-*. A considerable number of those given in the following lists are self-explanatory, and in these cases the definition is omitted.

2. With capital Q: A member of the religious society (the Society of Friends) founded by George Fox in 1648–50, distinguished by peaceful principles and plainness of dress and manners.

Acc. to Fox (*Jrnl.* I. 38) the name was first given to himself and his followers by Justice Bennet at Derby in 1650, 'because I bid them, Tremble at the Word of the Lord'. It appears, however, from a letter of intelligence, written at London on Oct. 14, 1647, that the name had previously been applied to the members of some foreign religious sect: 'I heare of a Sect of woemen (they are at Southworke) come from beyond Sea, called Quakers, and these swell, shiver, and shake, and when they come to themselves (for in all this fitt Mahomett's holy-ghost hath bin conversing with them) they begin to preache what hath bin delivered to them by the Spiritt' (*Clarendon MSS.* No. 2624). It thus seems probable that Bennet merely employed a term already familiar, and quite appropriate as descriptive of Fox's earlier adherents (cf. quots. 1654, 1694, and see Quaking *vbl. sb.* and *ppl. a.* 2). The name has never been adopted by the Friends themselves, but is not now regarded as a term of reproach.

Quantic (kwɒ·ntik). *Math.* [f. L. *quant-us* how much + -IC.] A rational, integral, homogeneous function of two or more variables.

A quantic according to its dimensions is a quadric, cubic, quartic, etc. according as it is of the 2nd, 3rd, 4th, etc. degree; and is binary, ternary, quaternary, etc. according as it has two, three, four, etc. variables.

Quantification (kwɒ·ntifikē·ʃən). [f. QUANTIFY *v.*: see -FICATION.] The action of quantifying.

Quantification of the predicate: the expression of the logical quantity of the predicate of a proposition, by applying to the predicate the sign *all*, or *some*, or an equivalent; a device introduced chiefly by Sir W. Hamilton, and intended to simplify logical processes.

c 1840 SIR W. HAMILTON *Logic* (1866) II. 297 Because the universal quantification of the predicate is, in this instance, materially false, is such quantification, therefore, always formally illegal? 1864 BOWEN *Logic* vii. 181 It is enough that the quantifications of the Middle Term in both Premises, added together, should exceed unity. 1882 PIAZZI SMITH in *Nature* XXVI. 552 All that we require for the..quantification of watery vapour.

2. To determine the quantity of, to measure.

The assertion of De Brieux (1672 *Origines .. de plusieurs façons de parler*, 16) that it arose in an agreement between the Dutch and Spaniards, by which the ransom of an officer or private was to be a quarter of his pay, is at variance with the constant sense of the phrases *give* and *receive quarter*.

Quartz (kwɔ̃ɹts). *Min.* [a. G. *quarz* (first in MHG.) of uncertain origin: hence also Du. *kwarts*, F. *quartz*, It. *quarzo.*]

1. A widely diffused mineral, massive or crystallizing in hexagonal prisms; in a pure form consisting of silica or silicon dioxide (SiO_2), but varying greatly in colour, lustre, etc., according to the different impurities it contains.

Quartz forms the rocks quartzite and sandstone, and is an important constituent in granite, gneiss, and other rocks. It frequently contains gold, and is largely mined and crushed for the purpose of extracting this metal (cf. quots. in 2). The numerous varieties are chiefly denoted by adjs. descriptive of their structure or colour, as (1) *amorphous, asteriated* (star-quartz), *capped, cavernous, compact,* (*crypto-*) *crystalline, fibrous, grained, radiated, sagenitic, sparry,* etc., (2) *blue* (siderite or sapphire-quartz), *brown* or *smoky* (cairngorm, morion), *green* (chrysoprase, prase), *milky* (milk-quartz), *purple* (amethyst), *red, rose, yellow* (citrine), etc.; also *Babel* or *Babylonian quartz*, found in Devonshire, showing on its under-surface the impression of the crystals of fluor-spar on which it was deposited. The colourless crystalline variety is known as Rock-crystal.

(2) In *β*-forms (ME. type *quitten*), a. later OF. *quitter* (cf. ON. *kvitta,* Sw. *qvitta,* Da. *kvitte*). The origin of this F. form is obscure; it apparently became common in the 14th c., but med.L. *quittare* is found in documents of the 13th (Du Cange).

The exact range of ME. *quitte(n* is difficult to determine (cf. QUIT *a.*); the usual form was undoubtedly *quite(n.* The pa. t. and pa. pple. of this were usually *quitte, quit* (less commonly *quited*), and this fact may have assisted in the general substitution of *quit* for *quite* which began in the latter part of the 16th c., and was practically complete by 1650. During the first half of the 17th c. the pa. t. and pple. vary between *quit* and *quitted,* the former being freq. employed even by writers who use *quit* in the inf. and pres.; in later use *quitted* is the standard form, *quit* being now dial. and U.S. colloquial.]

R.

R (ār), the eighteenth letter of the modern and seventeenth of the ancient Roman alphabet, is derived through early Greek Ρ, Ꝑ from the Phoenician ꟼ, representing the twentieth letter of the early Semitic alphabet. In general the character denotes an open voiced consonant in the formation of which the point of the tongue approaches the palate a little way behind the teeth; in many languages this is accompanied by a vibration of the tongue, in which case the *r* is said to be 'trilled'. This trill is almost or altogether absent in the *r* of modern standard English, which moreover retains its consonantal value only when it precedes a vowel; in other positions it has been vocalized to an ə-sound, in this Dictionary denoted by (ɹ), and even this is entirely lost after certain vowels. The earlier history of these sounds is somewhat obscure, as scholars differ in their views as to the formation of *r* in OE. times. In Scotland *r* is still strongly trilled in all positions, and other varieties of the sound are characteristic of certain districts, as the burred *r* of Northumberland and the reverted *r* of the south-west. By southern speakers *r* is frequently introduced in hiatus, esp. in the phrase *the idea(r) of*; in vulgar speech it is heard even in such forms as *draw(r)ing*.

In all periods of English, *r* has exercised a marked effect upon a preceding vowel. In OE., *e* and *a* before *r* + consonant became *eo*, *ea*, as in *steorfan* starve, *deorc* dark, *heorte* heart, *eorðe* earth; *hearm* harm, *wearp* warp. In late ME. and early mod.E. *er* usually became *ar*, *ear*, as in (*sterve*) starve, (*derk*) dark; (*herte*) heart, (*erthe*) earth, the date and extent of the change varying in different dialects. In a few cases (as *clerk*, *sergeant*, *Derby*) the spelling with *er* has been retained, while *ar* (ār) is pronounced. In mod.E. (prob. from about 1650) *e* (or *ea*) and *i* before *r* in close syllables have fallen together in one obscure vowel (ə), as in *berth*, *birth* (bəɹþ), *dearth* (dəɹþ), *dirt* (dəɹt), often not distinguished from (ʊ), as in *bur* (bʊɹ), *burn* (bʊɹn). The vowel-lengthening exemplified in these words is common to all cases in which *r* is not followed by a vowel, as *far* (fāɹ), *farm* (fāɹm), *for* (fǭɹ), *horse* (hǭɪs). The effect of *r* is also seen in the use of open vowels instead of the normal close ones, as in *care* (kē·ɹ), *here* (hī·ɹ), *moor* (mū·ɹ), *floor* (flō·ɹ). In a few words the vowel has been affected by a preceding *r*, as in *break* (brē·ɪk), *great* (grē·ɪt), *broad* (brǭd).

OE. *r* usually represents Germanic *r*, but in some cases takes the place of Germ. *z* (Goth. *z* or *s*), as in *ēare* ear (Goth. *auso*), *māra* more (Goth. *maiza*), *hord* hoard (Goth. *huzd*); hence the variation in verbal forms, as *lēosan*, *loren*; *cēosan*, *coren*. It was rarely dropped (as in *specan* to speak, for usual *sprecan*); but metathesis was frequent, and many of the forms resulting from this have been retained in the later language, as *beornan* to burn, *berstan* to burst, *hors* horse, *fryhtu* fright, North. *þirda* third. In some Scottish texts of the 15–16th c. there is a similar tendency to transpose *r* (as *trage* targe, *rehress* rehearse, *scruge* scourge), and it is sometimes neglected in rimes (as *large* : *age*).

Among the native words beginning with *r* in modern Eng. are a certain number which in OE. have initial *hr-*, as *hring* ring, *hræfn* raven, *hrēod* reed. This *h* was usually written down to the close of the OE. period, but had probably been dropped in speech at a somewhat earlier date; in the northern Gospels it is often erroneously prefixed, as in *hræst* rest, *hreafere* reaver, *hrioppa* reap. On the other hand, *w* before *r* was retained so late (being still pronounced in some Scottish dialects) that confusion between *wr-* and *r-* is comparatively rare, chiefly occurring with the words *rack*, *wrack*, and *rap*, *wrap*.
